Third year rotations at WVSOM are largely rural and preceptor based. Our students perceive that the non-resident rotations during the third year are less preparatory for Fourth Year Audition Rotations and subsequent residency training. Monthly Education Days incorporated into the Third Year Curriculum provide an opportunity to offer students in the South Central Region certain skills and enhancements in areas that will bridge any perceived gaps. Many of these tools are taken from the ACGME’s Clinical Learning Environment domains.

These include modules in:
1. Professionalism
2. Transitions of Care
3. Quality Improvement
4. Medical Disparities
5. Career Counseling
6. Fourth Year Rotation Scheduling
