

AACOMAS Matriculant Profile - Entering Classes 2011-2014

A four-year review of the AACOMAS matriculant pool offers some interesting comparisons over an extended time-frame. Four years is a convenient time-frame for analysis because that is the typical length of undergraduate medical education.

Following are some key elements to note regarding the matriculant pool for entering classes 2011 through 2014.

- **Total Matriculants** – The number of matriculants to the AACOMAS colleges has grown from 5,363 for 2011 to 6,465 for 2014, an increase of 21 percent over four years.
- **Gender** – For classes entering 2011 through 2014 the percentage of female matriculants was between 43 and 44 percent.
- **Age** – The mean age of matriculants over all four years is 25; the median age is 24.
- **Military Experience** – Over three years the percentage of veterans matriculating to the AACOMAS colleges has remained at 1.3 percent. The percentage of serving military personnel has declined slightly by 0.2 percent to 0.9 percent (data from 2012 through 2014 only).
- **Race/Ethnicity** – Over the four year period, the percentage of matriculants reporting underrepresented race/ethnicity status has increased from 6.9 percent to 8.2 percent. Underrepresented race/ethnicity status includes Hispanic/Latino ethnicity and Black/African-American, Native American/American Indian, and Hawaiian/Pacific Islander race.
- **Undergraduate Major** – The percentage of matriculants majoring in the life sciences has increased since 2011, from 66.2 percent to 69.7 percent. The percentages of matriculants reporting majors in the social sciences, physical sciences, and arts and humanities have remained stable. Most of the change has come with fewer matriculants reporting majors in other disciplines that are not categorized as noted.
- **Grade Point Averages** – Over four years the grade point averages – undergraduate and undergraduate plus graduate and/or post-baccalaureate have increased by about .02 to .03 points. Breaking out by GPAs show a similar increase.
- **MCAT scores** – Mean total MCAT scores have increased by 0.7 from 26.51 to 27.21 over four years. These increases are reflected in scores broken out by gender and race/ethnicity.
- **State/Country of Residence** – The percentage of matriculants who are US citizens/permanent residents has declined slightly from 99.2 to 99.0 percent over four years. Canadian matriculants have increased from 40 to 56 and other international matriculants have increased from 5 to 8. Within the cohort of US residents there is minimal change of state of legal residence over four years except that the percentage of matriculants from California has increased from 10.6 to 11.7 percent.

Note: The University of North Texas Health Sciences Center at Fort Worth/Texas College of Osteopathic Medicine and NYIT-COM's émigré program applicants are not included in this analysis because the data are not part of the AACOMAS database. UNTHSC/TCOM receives its applications through the Texas Medical and Dental School Application Service.
