# AACOMAS Applicant Profile - Entering Class 2011-2014

A four-year review of the AACOMAS applicant profile offers some interesting comparisons of the applicant pool over an extended time-frame. Four years is a convenient time-frame for analysis because that is the typical length of undergraduate medical education.

Following are some key elements to note looking at the applicant pool for entering classes from 2011 through 2014.

- **Total Applicants** – The number of individual applicants to the AACOMAS colleges has grown from 14,087 for 2011 to 17,944 for 2014, an increase of 27% over four years. Over the same time period the number of approved first-year seats available in the AACOMAS colleges increased from 5,157 to 6,192, an increase of 20 percent (this excludes TCOM and the NYIT COM émigré program that are not part of AACOMAS).
- **Gender** – Applications from women peaked at 51 percent of total applications for the 2006 entering class. For classes entering 2011 through 2014 the percentage of female applicants has ranged 46 to 47 percent.
- **Age** – The mean age of applicants over all four years is 25; the median age is 24.
- **Military Experience** – Over three years the percentage of veterans applying to the AACOMAS colleges has remained consistent at 1.5 percent. The percentage of serving military personnel has declined slightly to one percent (data from 2012 through 2014 only).
- **Race/Ethnicity** – Over the four-year period, the percentage of applicants reporting underrepresented race/ethnicity status has increased from 11.5 percent to 12.8 percent. (Underrepresented race/ethnicity status includes Hispanic/Latino ethnicity and Black/African-American, Native American/American Indian, and Hawaiian/Pacific Islander race.) There was a decline in applicants reporting underrepresented minority race/ethnicity status in the 2012 application year, but over the four years there is an increase.
- **Undergraduate Major** – The percentage of applicants majoring in the life sciences has increased over four years, from 64.2 percent to 68.0 percent. The percentages of applicants reporting majors in the social sciences, physical sciences, and arts and humanities have remained stable. Most of the change has come with fewer applicants reporting majors in other disciplines that are not categorized as noted.
- **Grade Point Averages** – Over four years the grade point averages – undergraduate and undergraduate plus graduate and/or post-baccalaureate have increased by about .02 to .03 points – from 3.41 (undergrad only)/3.43 (all courses) to 3.43 (undergrad only)/3.46 (all courses). Breaking out GPAs by demographic categories shows similar increases across gender and race/ethnicity status.
- **MCAT scores** – Mean total MCAT scores have increased by 0.6 from 25.66 to 26.26 over four years. These increases are reflected in scores broken out by gender and race/ethnicity.
- **State/Country of Residence** – The percentage of applicants who are US citizens/permanent residents has declined slightly from 99.2 to 98.6 percent over four years. Canadian applicants have increased from 114 to 210 and other international applicants have increased from 14 to 37. Within the cohort of US residents there is minimal change of state of legal residence over four years except that the percentage of applicants from California has increased from 10.3 to 11.8 percent. This increase for California has come from declines in the percentage of applicants spread across several other states.
