Welcome

Student Webinar: Navigating the Single GME Accreditation System

Wednesday, June 29, 2016
7:30 PM ET
Speakers

- Stephen C. Shannon, DO, MPH, President & CEO, American Association of Colleges of Osteopathic Medicine (AACOM)

- Boyd R. Buser, DO, AOA, President-Elect, Vice President of Health Affairs and Dean of the University of Pikeville-Kentucky College of Osteopathic Medicine (UP-KYCOM)

- Lorenzo Pence, DO, Senior Vice President for Osteopathic Accreditation, ACGME
Housekeeping Notes

• This webinar is being recorded, recording will be shared with participants and posted on AACOM’s website within a week

• Webinar participants are in listen-only mode

• Please make sure your computer volume is turned up. The audio for today’s event will be streamed through your computer speakers.

• For technical issues, please use the chat feature and raise your hand and we will assist you
Single GME Accreditation System

June 2016

Boyd R. Buser, DO
AOA President-Elect
Why a Single GME Accreditation System?

- Consistent methods of evaluation and accountability
- Enhanced opportunities for trainees
- One accreditation system transparent to:
  - Federal government
  - Licensing boards
  - Credentials committees
  - Public
AOA & AACOM integrated into governance and operations of new ACGME
Impact on Education Structure

The agreement **streamlines** the accreditation of GME programs but **preserves and protects** the structures within each medical profession.

**Changed**
- GME Accreditation

**Unchanged**
- Board Certification
- CME
- Predoctoral Education
- COMLEX

AOA Board Certification Will Continue!
What Students Need to Know

**GME Slots**
- All DOs and MDs will be eligible for training positions and fellowships
- MDs must demonstrate their readiness to enter osteopathic training

**Match**
- Last AOA Match expected to be no later than 2019
- Most AOA programs likely will participate in 2017 AOA Match
- Dually-accredited programs can participate in both matches

**COMLEX**
- All DO students required to pass COMLEX Levels 1 and 2 (CE and PE)
- ACGME does not require USMLE (but some programs do)
- COMLEX acceptance increasing

**AOA Certification**
- All DOs entering AOA accredited GME will be eligible for AOA board certification
- RCs adding AOA board certification pass rates to ACGME standards
What Students Need to Know

Application Deadline Could Impact AOA Match

Revised AOA Standard - Section 10.5

AOA training programs may not accept trainees beyond the date in which the trainee can complete the program by June 30, 2020, if the program has not made application for program accreditation by the ACGME.

The program may only participate in the AOA Match, or in other contracting arrangements such as signing outside the match if such application has been submitted by that specialty’s deadline date listed in Section 10.5.

Programs of four or more years duration are facing an AOA deadline of Jan. 1, 2017, to apply for ACGME accreditation to participate in the AOA match and accept new residents.
What Students Need to Know

AOA Opportunities Database

- Status of AOA programs seeking ACGME accreditation can be found at opportunities.osteopathic.org. Updated weekly.

Osteopathic Recognition

Student Demand for OGME

• 70% of third-year osteopathic medical students want osteopathic training (Source: AACOM)

• Osteopathic Recognition is opportunity for programs to be distinctive and respond to market demand

June 14, 2016, Email to Program Directors

A letter from osteopathic medical students

Dear Program Director,

We are writing on behalf of the Student Osteopathic Medical Association (SOMA) and Council on Student Government Presidents (COSGP) to respectfully urge you to transition your osteopathic residency program to Accreditation Council for Graduate Medical Education (ACGME) accreditation, and to pursue Osteopathic Recognition, in order to advance our profession and promote the value of osteopathic medicine in health care.

SOMA is the student affiliate organization of the American Osteopathic Association (AOA) and works with all chapters to foster communication between federal and state policymakers and osteopathic physicians, students and professionals. COSGP is the official national leadership council of the American Association of Colleges of Osteopathic Medicine (AACOM) and represents all osteopathic medical students.

Transitioning all currently AOA-accredited programs to ACGME accreditation is essential for our profession. As you know, the number of DOs who want to train in osteopathic residencies exceeds available slots. More than 3,000 osteopathic medical students participated in this year’s AOA match. With one in four U.S. medical students enrolled in a College of Osteopathic Medicine, the demand is increasing every year. We need every program to keep their commitment to training DO graduates.

Navigating The Single Graduate Medical Education Accreditation System

Lorenzo L. Pence, D.O., FACOFP
Senior Vice President, Osteopathic Accreditation
ACGME

AACOM Student Webinar
June 29, 2016
Disclosures

I have nothing to disclose or any financial conflicts
Objectives

- Provide update Single Accreditation System
- Definitions Pre-accreditation, Continued Pre-accreditation, and Initial Accreditation process
- Describe the pathways:
  - ONMM
- Review Program application statistics
- Identify resources that provides information about the Single Accreditation System
ACGME Mission

“We improve health care and population health by assessing and advancing the quality of resident physicians' education through accreditation.”
ACGME Programs

- 9,976 GME programs*
- 125,851 residents*
- 792* sponsoring institutions
- 139* specialty and subspecialty areas
- 29 Review Committees
- 1 Recognition Committee
- Approximately 6,000+ items/decisions per year

*ACGME Data AY 2015-16 (6-28-2016)
AOA Programs Transitioning to ACGME Accreditation

- Terms
  - Pre-accreditation
  - Continued Pre-accreditation
  - Initial accreditation
  - Dual accredited program
  - Parallel Program

© 2016 Accreditation Council for Graduate Medical Education (ACGME)
“Pre-Accreditation”

• AOA Programs that have applied for ACGME accreditation but have not been reviewed by an ACGME Review Committee
• These programs maintain their full AOA accreditation
“Pre-Accreditation Status”

- Created for and to be applied only during the transition to ACGME accreditation for currently AOA-approved programs
- Extended to include institutions
- Is not synonymous with Initial Accreditation
- Granted upon receipt of completed application
- Does not require Institutional review committee/Residency Review Committee review
- Status will be publicly acknowledged

© 2016 Accreditation Council for Graduate Medical Education (ACGME)
“Pre-Accreditation Status”

• Once pre-accreditation is granted, programs and sponsors must participate in all required annual ACGME reporting:

  • Programs with pre-accreditation status can begin the application process for Osteopathic Recognition. Once programs achieve Initial Accreditation, applications can be reviewed by the Osteopathic Recognition Committee.

  • June 30, 2020 – All sponsoring institutions and programs must achieve initial accreditation. The AOA ceases to accredit GME programs.
Continued Pre-Accreditation

• AOA Institutions or Programs that have been reviewed by the appropriate review committee (IRC/RRC) but have not yet achieved ACGME initial accreditation are noted as having “continued pre-accreditation” status
• Institutions or programs are still fully accredited by the AOA
• Institutions or programs will receive full report from IRC/RRC with a full description of the requirements that need to be addressed
Initial Accreditation

• AOA Institution or Program application that has been reviewed by the appropriate review committee (IRC/RRC) and the committee has determined the new program or institution substantially complies with requirements

• Institution or program has achieved ACGME Accreditation
Initial Accreditation Contingent

• The appropriate review committee has determined the application for a new program substantially complies with the requirements but the sponsoring institution has not achieved initial accreditation from the IRC
• Program can not be ACGME accredited until sponsoring institution has initial accreditation
• The program still has full AOA accreditation
• Upon Institution achieving Initial Accreditation, the program will achieve ACGME Accreditation (sponsoring institution has 24 month window to achieve initial accreditation or program must resubmit its application
Dually-Accredited Programs

- Refers to programs that are accredited by *both* the ACGME and the AOA
- Dually-accredited programs do not need to do anything by way of application in the SAS.
- They *may* need to ask RC for complement increase if residents in the AOA program are *not* currently counted in ACGME complement.
- They *may* seek Osteopathic Recognition
Parallel-Accredited Programs

- Refers to two programs in the same specialty / subspecialty and in the same institution with one accredited by ACGME and one accredited by AOA but with no overlap between the two.

- *May* remain separately accredited through application of AOA-approved program but…

- Expect in most instances programs will merge

- They *may* seek Osteopathic Recognition
Osteopathic Neuromusculoskeletal Medicine (ONMM)

- New Core Residency
- New ONMM Review Committee
- Residents enter ONMM residency (24 month program) after completing Preliminary year
- Residents may enter program at 2 entry points
  - Pathway 1
    - Entry Point ONMM1
  - Pathway 2
    - Entry Point ONMM2
<table>

\textsuperscript{^}Must be able to complete outlined rotations during the first year.
\textsuperscript{^\textsuperscript{^}}Must complete a minimum of 12 months of NMM rotations.
\textsuperscript{**}Must have been in an osteopathic-focused position in a program with Osteopathic Recognition or have been in an AOA-approved program.

© 2016 Accreditation Council for Graduate Medical Education (ACGME)
Pathway 2 – ONMM2
Level of Entry

Eligibility:

ACGME-accredited residency program with Osteopathic Recognition (in an osteopathic-focused position).**

And

Completion during that residency of a minimum of 12 months of rotations required for the ONMM program.

** Completion of an AOA-approved residency program is also acceptable.
Osteopathic Recognition

- Commitment by a program to teach and assess Osteopathic Principles and Practices (OPP) at the graduate medical education level.

- Osteopathic Recognition is conferred upon any ACGME-accredited graduate medical education program providing requisite training in Osteopathic Principles and Practice (OPP).
Why Osteopathic Recognition?

- Provides an organized approach to perpetuate osteopathy’s contributions to patient care.
- Creates opportunity for all physicians to learn Osteopathic Principles and Practices.
- Creates program distinctiveness.
- Programs with Osteopathic Recognition are acknowledged on the ACGME website.
Initial Recognition

- ACGME Programs (any specialty) or AOA programs in Pre-Accreditation may submit application for Osteopathic Recognition (OR),

- Osteopathic Principles Committee (OPC, new ACGME committee) reviews applications for OR (program must be ACGME accredited before application can be reviewed by OPC)

- Applications that have been reviewed by the OPC committee and the committee determines the program substantially complies with OR requirements will achieve Initial Recognition

Questions

• What should a rising fourth year student be familiar with?
  • Become familiar with transition to SAS
  • Review information from ACGME, AOA, and AACOM
  • Work with COM GME Deans
  • Students should become familiar with ERAS
    • AOA and NRMP matches use ERAS
  • Become familiar with the match process
Questions

• What questions should a rising fourth year be asking?
  • Has the program or does the program plan to apply for ACGME accreditation
  • Has the program or does the program plan to apply for Osteopathic Recognition
  • Which match(s) should I participate
  • What are my board certification options
  • What are my fellowship options
Questions

• What does the status of a program indicate to me as a student for fellowship opportunities and board certification?
“Pre-Accreditation Status”

Importance to AOA programs:

• Programs in “pre-accreditation status” pay application fee only once – regardless of number of re-applications

• Individuals who complete programs that have previously achieved “pre-accreditation status” will be subject to 2013 or 2016 eligibility standards, whichever is less restrictive.

• Not all graduates of programs with “pre-accreditation status” will be eligible for all ACGME programs
Eligibility Requirements

- Students and Residents need to review eligibility requirements for each specialty or subspecialty to determine what is required to enter a specialty or fellowship.

- AOA programs in pre-accreditation may benefit graduates who seek fellowship training.
Eligibility Requirements
Eligibility Requirements

The ACGME recognizes that the best solutions often come from shared learning. With the support of partnering organizations in health care quality and education, the ACGME launched a new initiative to facilitate improvements in our nation's clinical learning environments.

Eligibility Requirements
Eligibility Requirements

Common Program Requirements are in BOLD

Geriatric Medicine (Family Medicine)

Eligibility Requirements in Effect on June 30, 2013

III.A. Eligibility Criteria

Each fellow must successfully complete an ACGME-accredited specialty program and/or meet other eligibility criteria specified by the Review Committee. The program must document that each fellow has met the eligibility criteria.

III.A.1. Fellows should have satisfactorily completed an ACGME-accredited residency in family medicine or internal medicine, or a family medicine residency that has been accredited by either the College of Family Physicians of Canada or the American Osteopathic Association.

Eligibility Requirements Effective July 1, 2016

Requirements – Fellowship

Fellows are expected to have completed a three-year ACGME-accredited fellowship program in family medicine or an ACGME-accredited program, or an RCPSC-accredited program located.

Fellowship programs must receive each entering fellow’s level of the required field using ACGME milestones assessments from the program. (Core)
III.A.1. Applicants must have completed an ACGME or American Osteopathic Association (AOA)-accredited residency program in anesthesiology, emergency medicine, family medicine, internal medicine, neurology, obstetrics and gynecology, pediatrics, physical medicine and rehabilitation, psychiatry, radiation oncology, or surgery.
Eligibility Requirements

Cardiovascular Disease (Internal Medicine)

## Frequently Asked Questions: Single Accreditation System

**Accreditation Council for Graduate Medical Education (ACGME)**

These FAQs address elements of the single accreditation system resulting from an agreement among ACGME, the American Osteopathic Association (AOA) and the American Association of Colleges of Osteopathic Medicine (AAMC). Please refer to the [ACGME Glossary of Terms](#) for clarification on some of the terms used in this document.

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Eligibility for Fellowship</strong></td>
<td>Some disciplines do accept AOA-approved prerequisite training as eligible for entry into ACGME-accredited fellowships. Others require that prerequisite training occur only in ACGME-accredited programs for such eligibility. Starting July 1, 2016, eligibility requirements for all fellowship positions will require completion of prerequisite training in a program accredited by the ACGME, the Royal College of Physicians and Surgeons of Canada (RCPSC) or the College of Family Physicians of Canada (CFPC). Between July 1, 2015 and June 30, 2020, a resident who completes prerequisite training in an AOA-approved program with pre-accreditation status will be subject to the ACGME fellowship eligibility standards (per subspecialty) that were in effect June 30, 2013 or July 1, 2016, whichever is less restrictive. A number of Review Committees (see here for a list) allow programs to grant an exception to the eligibility requirements for prior training. If an individual is appointed to a fellowship program based on the “exceptionally qualified applicant provision” detailed in the ACGME Common Program Requirements, and has successfully completed Levels 1, 2, and 3 of COMLEX USA, he/she will not be required to take USMLE. This applies only to graduates of programs with a status of pre-accreditation. <strong>NOTE:</strong> Some subspecialties did not in 2013, and will not in 2016, accept as prerequisite training anything other than completion of an ACGME-accredited program. <em>The eligibility requirements for every ACGME-accredited subspecialty that were in effect as of June 30, 2013, that were/are in effect between June 30, 2013 and July 1, 2016, and that will be in effect as of July 1, 2016, are available on the Single GME Accreditation System section of the ACGME website.</em></td>
</tr>
<tr>
<td>Are graduates of programs with dual accreditation eligible for ACGME-accredited fellowships?</td>
<td>A program with dual accreditation is accredited by the ACGME, and each of its graduates who are listed in ADS (see the section on programs with dual accreditation above) are eligible for ACGME-accredited fellowship positions.</td>
</tr>
</tbody>
</table>
Which Residency Review Committees (RC) will accept AOA First year (internship) training?
RC Decisions on Non-ACGME Preliminary Clinical Years (AOA Internships)

• Several ACGME Review Committees (RCs) have determined that, during the transition to the single GME accreditation system, residency programs in specialties requiring a preliminary clinical year will be permitted flexibility in accepting residents who have completed this training in an AOA-approved program.

• During this transition, ACGME-accredited residency programs in these specialties can consider applicants from AOA-approved internship programs that are not yet pre-accredited or accredited by the ACGME and not jeopardize their accreditation status if they accept such applicants.

• RCs permitting this flexibility have communicated this information through FAQs and/or other communications with program directors in the specialty.

Anesthesiology - FAQ Language

Are individuals who completed a broad-based clinical year in an AOA-approved program eligible to apply to ACGME-accredited anesthesiology programs?

[Program Requirement: III.A.1.]

The RRC understands that during this 2015-2017 transition, core programs which require a pre-requisite year may wish to consider applicants in AOA accredited programs that are not yet pre-accredited or accredited by the ACGME. Core programs will not jeopardize their accreditation status if they accept these individuals. Programs should check with the ABA and/or the American Osteopathic Board of Anesthesiology (AOBA) regarding certification eligibility.
Dermatology –FAQ Language

- Are individuals who completed a broad-based clinical year in an AOA-approved program eligible to apply to ACGME-accredited dermatology programs?

- [Program Requirement: III.A.1.]

- The Review Committee understands that during the transition period to a single accreditation system, programs may wish to consider applicants from AOA-approved programs that are not yet pre-accredited or accredited by the ACGME. Core programs will not jeopardize their accreditation status if they accept such applicants. Applicants should check with the ABD and/or the American Osteopathic Board of Dermatology (AOBD) regarding certification eligibility.
Are individuals who completed a traditional rotating osteopathic internship in an AOA-approved program eligible to apply to ACGME-accredited physical medicine and rehabilitation programs?

[Program Requirement: III.A.1.]

The Review Committee understands that during the transition period to a single accreditation system, programs may wish to consider applicants from AOA-approved programs that are not yet pre-accredited or accredited by the ACGME. Core programs will not jeopardize their accreditation status if they accept such applicants. Applicants should check with the ABPMR and/or the American Osteopathic Board of Physical Medicine and Rehabilitation (AOBPMR) regarding certification eligibility.

SINGLE GME ACCREDITATION SYSTEM

On February 26, 2014, the Accreditation Council for Graduate Medical Education (ACGME), American Osteopathic Association (AOA), and American Association of Colleges of Osteopathic Medicine (AACOM) announced their agreement to a Memorandum of Understanding (MOU) outlining a single graduate medical education accreditation system in the United States. The single accreditation system allows graduates of allopathic and osteopathic medical schools to complete their residency and/or fellowship education in ACGME-accredited programs and demonstrate achievement of common Milestones and competencies.

THE EXECUTIVE SUMMARY OF THE MOU

The ACGME and AOA have created and will continue to create elements of operations and infrastructure to ensure a smooth transition to the single system. AOA-approved programs and sponsoring institutions can now apply for ACGME accreditation, and must achieve ACGME initial accreditation by June 30, 2020, the conclusion of the agreement and the date the AOA will cease accreditation activities.
