Pre-Accreditation Status

Importance to AOA programs:

- Individuals who complete programs that have previously achieved “pre-accreditation status” will be subject to 2013 or 2016 eligibility standards, whichever is less restrictive.

- Not all graduates of programs with “pre-accreditation status” will be eligible for all ACGME programs.
Eligibility Requirements
Eligibility Requirements

Resident/Fellow Eligibility

Below are the eligibility requirements for each specialty (in bold font) and subspecialty (not in bold) that are (1) in effect on June 30, 2013; and (2) in effect as of July 1, 2016. If applicable, any interim requirements in effect between those dates are also provided.

- Allergy and Immunology
- Anesthesiology
  - Adult Cardiothoracic Anesthesiology
  - Anesthesiology Critical Care Medicine
  - Clinical Informatics
  - Hospice and Palliative Medicine
  - Regional Anesthesiology and Acute Pain Medicine
- Pain Medicine
- Pediatric Anesthesiology
  - Regional Anesthesiology and Acute Pain Medicine
- Colon and Rectal Surgery
- Dermatology
  - Dermatopathology
  - Micrographic Surgery and Dermatologic Oncology
- Emergency Medicine
  - Clinical Informatics
  - Emergency Medical Services
  - Medical Toxicology
Eligibility Requirements

III.A.1. Applicants must have completed an ACGME or American Osteopathic Association (AOA)-accredited residency program in anesthesiology, emergency medicine, family medicine, internal medicine, neurology, obstetrics and gynecology, pediatrics, physical medicine and rehabilitation, psychiatry, radiation oncology, or surgery.
Eligibility Requirements

Geriatric Medicine (Family Medicine)

### III.A.1. Eligibility Criteria

Each fellow must successfully complete an ACGME-accredited specialty and/or meet other eligibility specified by the Review Committee. The program must document that the fellow has met the eligibility criteria.

**Eligibility Requirements Effective July 1, 2016**

- Fellows must have completed an ACGME-accredited residency in family medicine or internal medicine, or a family medicine residency that has been accredited by either the College of Family Physicians of Canada or the American Osteopathic Association.
- Fellows must receive a passing score in the CanMEDS Milestones assessments from the core residency program.
- For fellowship programs, fellows must have successfully completed an ACGME-accredited medicine residency, or medicine residency located in RCPSC-accredited or DIO-recognized program.
## Eligibility Requirements

### Frequently Asked Questions: Single Accreditation System

Accreditation Council for Graduate Medical Education (ACGME)

These FAQs address elements of the single accreditation system resulting from an agreement among ACGME, the American Osteopathic Association (AOA) and the American Association of Colleges of Osteopathic Medicine (AACOM). Please refer to the ACGME Glossary of Terms for clarification on some of the terms used in this document.

<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Will individuals who are currently enrolled in AOA-approved residency programs be eligible for entry into ACGME-accredited fellowships?</td>
<td>Some disciplines do accept AOA-approved prerequisite training as eligible for entry into ACGME-accredited fellowships. Others require that prerequisite training occur only in ACGME-accredited programs for such eligibility. Starting July 1, 2016, eligibility requirements for all fellowship positions will require completion of prerequisite training in a program accredited by the ACGME, the Royal College of Physicians and Surgeons of Canada (RCPSC) or the College of Family Physicians of Canada (CFPC). Between July 1, 2015 and June 30, 2020, a resident who completes prerequisite training in an AOA-approved program with pre-accreditation status will be subject to the ACGME fellowship eligibility standards (per subspecialty) that were in effect June 30, 2013 or July 1, 2016, whichever is less restrictive. A number of Review Committees (see here for a list) allow programs to grant an exception to the eligibility requirements for prior training. If an individual is appointed to a fellowship program based on the “exceptionally qualified applicant provision” detailed in the ACGME Common Program Requirements, and has successfully completed Levels 1, 2, and 3 of COMLEX USA, he/she will not be required to take USMLE. This applies only to graduates of programs with a status of pre-accreditation. <strong>NOTE:</strong> Some subspecialties did not in 2013, and will not in 2016, accept as prerequisite training anything other than completion of an ACGME-accredited program. <em>The eligibility requirements for every ACGME-accredited subspecialty that were in effect as of June 30, 2013, that were in effect between June 30, 2013 and July 1, 2016, and that will be in effect as of July 1, 2016, are available on the Single GME Accreditation System section of the ACGME website.</em></td>
</tr>
<tr>
<td>Are graduates of programs with dual accreditation eligible for ACGME-accredited fellowships?</td>
<td>A program with dual accreditation is accredited by the ACGME, and each of its graduates who are listed in ADS (see the section on programs with dual accreditation above) are eligible for ACGME-accredited fellowship positions.</td>
</tr>

List of Programs Offering Education in Osteopathic Principles and Practice

List of Withdrawn Programs
Report shows programs that have achieved Osteopathic Recognition (OR), as well as those programs that have applied for OR but have not yet had their applications reviewed by the Osteopathic Principles Committee (OPC).
How to report licensing exam scores, is it mandatory to release COMLEX & USMLE scores if exams have been taken?

- Applicants should research individual program requirements for minimum scores for COMLEX and/or USMLE.
- Applicants must authorize release of COMLEX and USMLE scores and assign to programs they designate (in ERAS).
- USMLE transcripts can only be assigned to ACGME accredited programs.
- COMLEX transcripts can be assigned to AOA and ACGME accredited programs.
Status of applications for Osteopathic Recognition. Does current rate of OR applications indicate how many programs will retain osteopathic focus?

- ACGME-accredited programs can apply for Osteopathic Recognition.
- Programs in ACGME pre-accreditation may apply, but their application must wait to be reviewed until the program has Initial Accreditation.
- OR applications to date:
  - Dually accredited programs
  - AOA programs that have achieved accreditation
  - ACGME programs with no history of formal osteopathic training
- Future applications for OR look very favorable
## ACGME ONMMM Residency

^Must be able to complete outlined rotations during the first year.

^^Must complete a minimum of 12 months of NMM rotations.

**Must have been in an osteopathic-focused position in a program with Osteopathic Recognition or have been in an AOA-approved program.
• Combined training consists of an educational experience in two or more specialty or subspecialty programs. (IM/EM, FM/EM, etc.)
  • Duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together

• Integrated programs similar to combined with no shorting of training

• Educational plan for combined training is approved by the certification board of each specialty
  • Assure that resident physicians completing combined training are eligible for board certification in each component specialty
  • Each specialty program is separately accredited by ACGME through its respective specialty review committee
